Data Points

2007 Diagnosis and Procedure Codes Updated

We have recently updated our reference tables to include the 2007 version of the ICD-9, CPT, and HCPCS codes. All the related code reports available on the MHMR website are up-to-date. Those reports are available under the Reports section at the bottom of the Implementation Guide section at http://www.mhmr.ky.gov/cmhc/cmhc_data_guide.asp.

Crisis Services Reported at Non-CSU Sites

In the Event file, if the value for Provider Number corresponds to a Site Code that is not a CSU Site and if the *DMHMRS Modifier 1* value for that record equals "038" or "039", then a Possible Error will be reported on the Data Quality Report. Beginning with FY2008, that same logic will be applied to the new service code "076" (MH Non-Residential Crisis Response).

Substance Abuse Services Reported at Non-ISATS Sites

A new edit check has been added to the Event file to identify Substance Abuse services provided by non-ISATS sites. Effective immediately, this will generate a Possible Error on the Data Submission Reports.

SA services are identified based on the *DMHMRS Modifier 1* field and the *Special Program Indicator* field. For the specific criterion for Substance Abuse determination, see the CMHC Data Dictionary (http://www.mhmr.ky.gov/cmhc/files/ImpGuide_2007/91-Data%20dictionary.pdf).
Non-ISATS sites are those providers where RDMC has not been provided with a federal I-SATS (Inventory of Substance Abuse Treatment Services) code.
